India has always worked for peace, says Satyarthi

JAIPUR: In the wake of heightened tension in Indo-Pak ties following the surgical strike targeting terror camps across LoC, Nobel laureate Kailash Satyarthi said on Saturday peace has been the tradition of India and people should have faith in the government.

"India has been a great country and has always worked for peace...Ravana was killed and Mahabharta had also taken place in this country but all for establishing peace," he told a gathering of students here. **PTI**
